

## Parijat Active-X for Siemens S7 series PLC's via TCP

### PCI-SI-S7ETHER.ACTX

Developed using state of the art Microsoft MFC4 technology for enhanced throughput and low overhead, Parijat's PLC communication 32-bit OLE custom controls (Active-X/OCX), acquires/sends data from or to Siemens S7® family PLC's via 3Com type Ethernet card. Active-X supports Fetch/Write protocol in 32 bit Windows95 and above. Read or write any PLC memory type. Manipulate properties using our custom property sheets for utmost user-friendliness at design time. Auto polling interval may be set or control polling through your code for optimum performance. Active-X's are very fast and also do not require significant Windows resources as DDE or OPC servers do. This product should support S5 PLCs also.

**Methods:** Refresh

**Events:** Outcome (fires when communication transaction completes)

**This product works with:**

**Visual Basic, Microsoft Visual C++/J++ , Access95, Excel95,**

**Foxpro95 or any other OLE container.**

Related VBX Products: SER505, TIWAY, S53964R.

ActiveX-32 Products: SER505, CTI2572 TCP/IP, PLC resident 3964

### Features:

- No software protection keys or disks.
- Complete context-sensitive help and built-in manual.
- Works in Windows 95, Windows NT and above.

*We also develop custom Windows products and applications with PLC's, MS Visual Basic, as well. We can also develop any ActiveX that you may need developed for a specific purpose. We also have an GUI MMI software(Visual Process) written in VB which provides basic SCADA monitoring, alarming, trending, reporting. With Visual Process, any CAD drawings, manuals, vendor data sheets, instrument spec sheets, instrument calibration sheets or any other documentation associated with control systems may also be integrated with the MMI/SCADA system to help attain the ISO9000 certification!*
