

Profinet Master

Overview:

PROFINET Master (Profinet acronym for Process Field Net) is an industry technical standard for data communication over Industrial Ethernet, designed for collecting, and controlling Data from Profinet slave, with a particular strength in delivering data under tight time constraints (on the order of 1ms or less). This driver allows bidirectional communications with Profinet slaves/servers.

Features:

- Read / Write of cyclic/acyclic I/O data in various formats.
- No other hardware except ethernet cable between the PC and the Profinet field device needed.

9/3/17
